Industrial Engineering student and community builder with technical product experience in AI, data, and hardware. Led operations and partnerships to grow a cultural platform to 700K+ followers.

Education

Ontario Tech University, B.Eng in Industrial Engineering **Expected April 2027**
Relevant Coursework: AI and Machine Learning, Industrial Automation (PLCs), Operations Research, Data Analytics, Integrated and Digital Manufacturing, Project Management

Skills & Certifications

- **Technical:** Python, SQL, PLC integration, MATLAB, Excel, Tableau, Power BI, Figma, Jira
- **Product & Operations:** Product roadmapping, requirements gathering, user research, A/B testing, KPI dashboards, go-to-market strategy, Agile/Scrum
- IBM SkillsBuild Cybersecurity Analyst Professional Certificate

Professional Experience

Head of Operations & Product Manager, FilipinosInThe6ix **May 2022 - Present**
Toronto, Ontario, Canada

- Owned video strategy, growing to **700K+ followers** and lifting engagement **35% YoY** through A/B tests
- Launched community events with **10K+ attendees**, building custom registration and waiver-tracking systems used by coaches, vendors, and event staff
- Drove **$200K+ revenue** via sponsorships and merch, managing production from sourcing to fulfillment
- Led sponsor, venue, and creator planning for a **6-city U.S. tour**, producing filmed interviews and podcasts

Product Manager, WareShare **Mar 2026 - Present**
Toronto, Ontario, Canada

- Signed new warehouse owners onto the marketplace, using their feedback to simplify the listing process
- Helped redesign and launch the website to make warehouse space easier to search and compare
- Designed SOPs and KPI reporting templates to standardize partner onboarding and track performance
- Owned marketing for both sides of the marketplace with warehouse owners and businesses seeking space

AI and Growth Fellow, Boardy **Oct 2025 - Jan 2026**
Toronto, Ontario, Canada

- Selected for an AI product fellowship (**top 1% of applicants**) alongside students from top global universities
- Analyzed user feedback and engagement data to find friction points, shaping go-to-market messaging
- Collaborated with fellows and the Boardy team on growth experiments for an AI networking startup later named a **top 15** fastest-growing AI company

Consultant Product Manager, Atsign **May 2023 - Aug 2025**
San Jose, California, USA

- Presented roadmap and technical recommendations to leadership, informing major product decisions
- Built weekly KPI dashboards tracking adoption, throughput, and system usage to guide product priorities
- Shaped positioning via competitor research and content tests, earning **20K+ impressions in 8 weeks**
- Promoted from intern to Consultant Product Manager within **18 months** based on performance

Aerostructures Engineer and On-Board Camera Lead, Ontario Tech Rocketry **Sep 2023 - Apr 2025**
Oshawa, Ontario, Canada

- Led design and testing of the rocket's on-board camera system against flight requirements
- Load-tested airframe structures for vibration and shock, redesigning failed parts for durability
- Managed timelines and handoffs across a **10+ member team** spanning design, manufacturing, and testing

Projects

Production Planning Automation, Kawartha Dairy **Aug 2026 - Present**

Capstone Project, Ontario Tech University (Expected 2027)

- Studying the production floor to map how daily targets are set and communicated to operators
- Connecting Python and SQL to the plant's PLC so the HMI auto-updates with daily production targets
- Integrating an LLM to generate end-of-day production reports comparing output to targets
- Replacing manual target updates, giving operators real-time visibility into daily production

K-swapped Honda Fit **Jan 2026- Present**

GroupN Racing

- Planned and documented a K-series engine swap on a Honda Fit, from parts sourcing to installation
- Secured and managed sponsorship partners, delivering build updates and media content on schedule
- Tracked build progress, risks, and dependencies to keep mechanical and media work on track.

Canadian Natural Disaster Live Tracker (OEC 3rd Place Finalist) **Feb 2025**

Ontario Engineering Competition 2025

- Defined requirements and architecture for a real-time platform tracking disasters across Canada
- Integrated an LLM to turn raw disaster feeds into plain-language summaries and alerts for users
- Built data pipelines for ingestion, transformation, and visualization, improving reliability and latency
- Led UI/UX design and feature prioritization to ship a working product under competition time limits

TutorBo! AI Tutoring Assistant **Jan 2024**

Hack the Valley UofT Scarborough 2024

- Led product development of a hands-free AR tutor that lets students ask questions by voice
- Built conversational AI using Cohere NLP and speech recognition to guide students in real time

Awards

- **3rd Place**, Ontario Engineering Programming Competition (2025)
- **2nd Place**, Autonomous Driving Club Hackathon (2025)
- **1st Place**, NASA Space Apps Challenge (2024)
- **1st Place**, OTU Engineering Consulting Competition (2023)
- **1st Place**, OTU Communications Competition (2022)

Leadership Experience

Director of Youth Outreach, Lead With Voice **Aug 2025 - Present**

- Mentor at-risk youth one-on-one on goals, school, and next steps, building confidence to stay on track
- Lead outreach events across the GTA, bringing more young people into mentorship and leadership programs

Organizer, Filipino Heritage Hoopfest **Aug 2023 - Present**

- Help organize an annual tournament that brings together 30+ youth teams and their families
- Capture photo and video coverage on game day, producing highlight content for teams and sponsors

Council Chairman, OTU Engineering Society **Sep 2022 - Aug 2023**

- Chaired council meetings, setting agendas and driving decisions on society events, budgets, and initiatives
- Represented Ontario Tech's engineering student body at provincial and national engineering conferences

Crowd Support, Overwatch Championship Series **Jul 2022 - Aug 2022**

- Energized live crowds at a professional esports championship, helping deliver a smooth fan experience
- Worked with event staff to keep fans engaged between matches and during live broadcast segments
